TIPS FOR GOOD PRINTS

Start In Camera

Start with sharp photos

Shoot it in RAW

Custom White Balance(if Possible)

Shoot test image with Color Checker, Grey Card

Fill Frame with image

Increase image size with Multi shot Panos

TIPS FOR GOOD PRINTS

In the computer (The Basics)

Set White and Black point

Correct white balance

Correct Colors

Noise reduction

Avoid cropping

Soft proofing

Sharpening , Basic and for paper/printer

Enhance resolution in Lightroom if Needed

Export Max Resolution for printing

Follow printer/Print shop recommendations

Crop image to aspect ratio for each print size

Export to Highest resolution possible

TIPS FOR GOOD PRINTS

In the computer (Extras)

Color space -sRGB, Adobe98, ProPhoto RGB (per print service requirement)

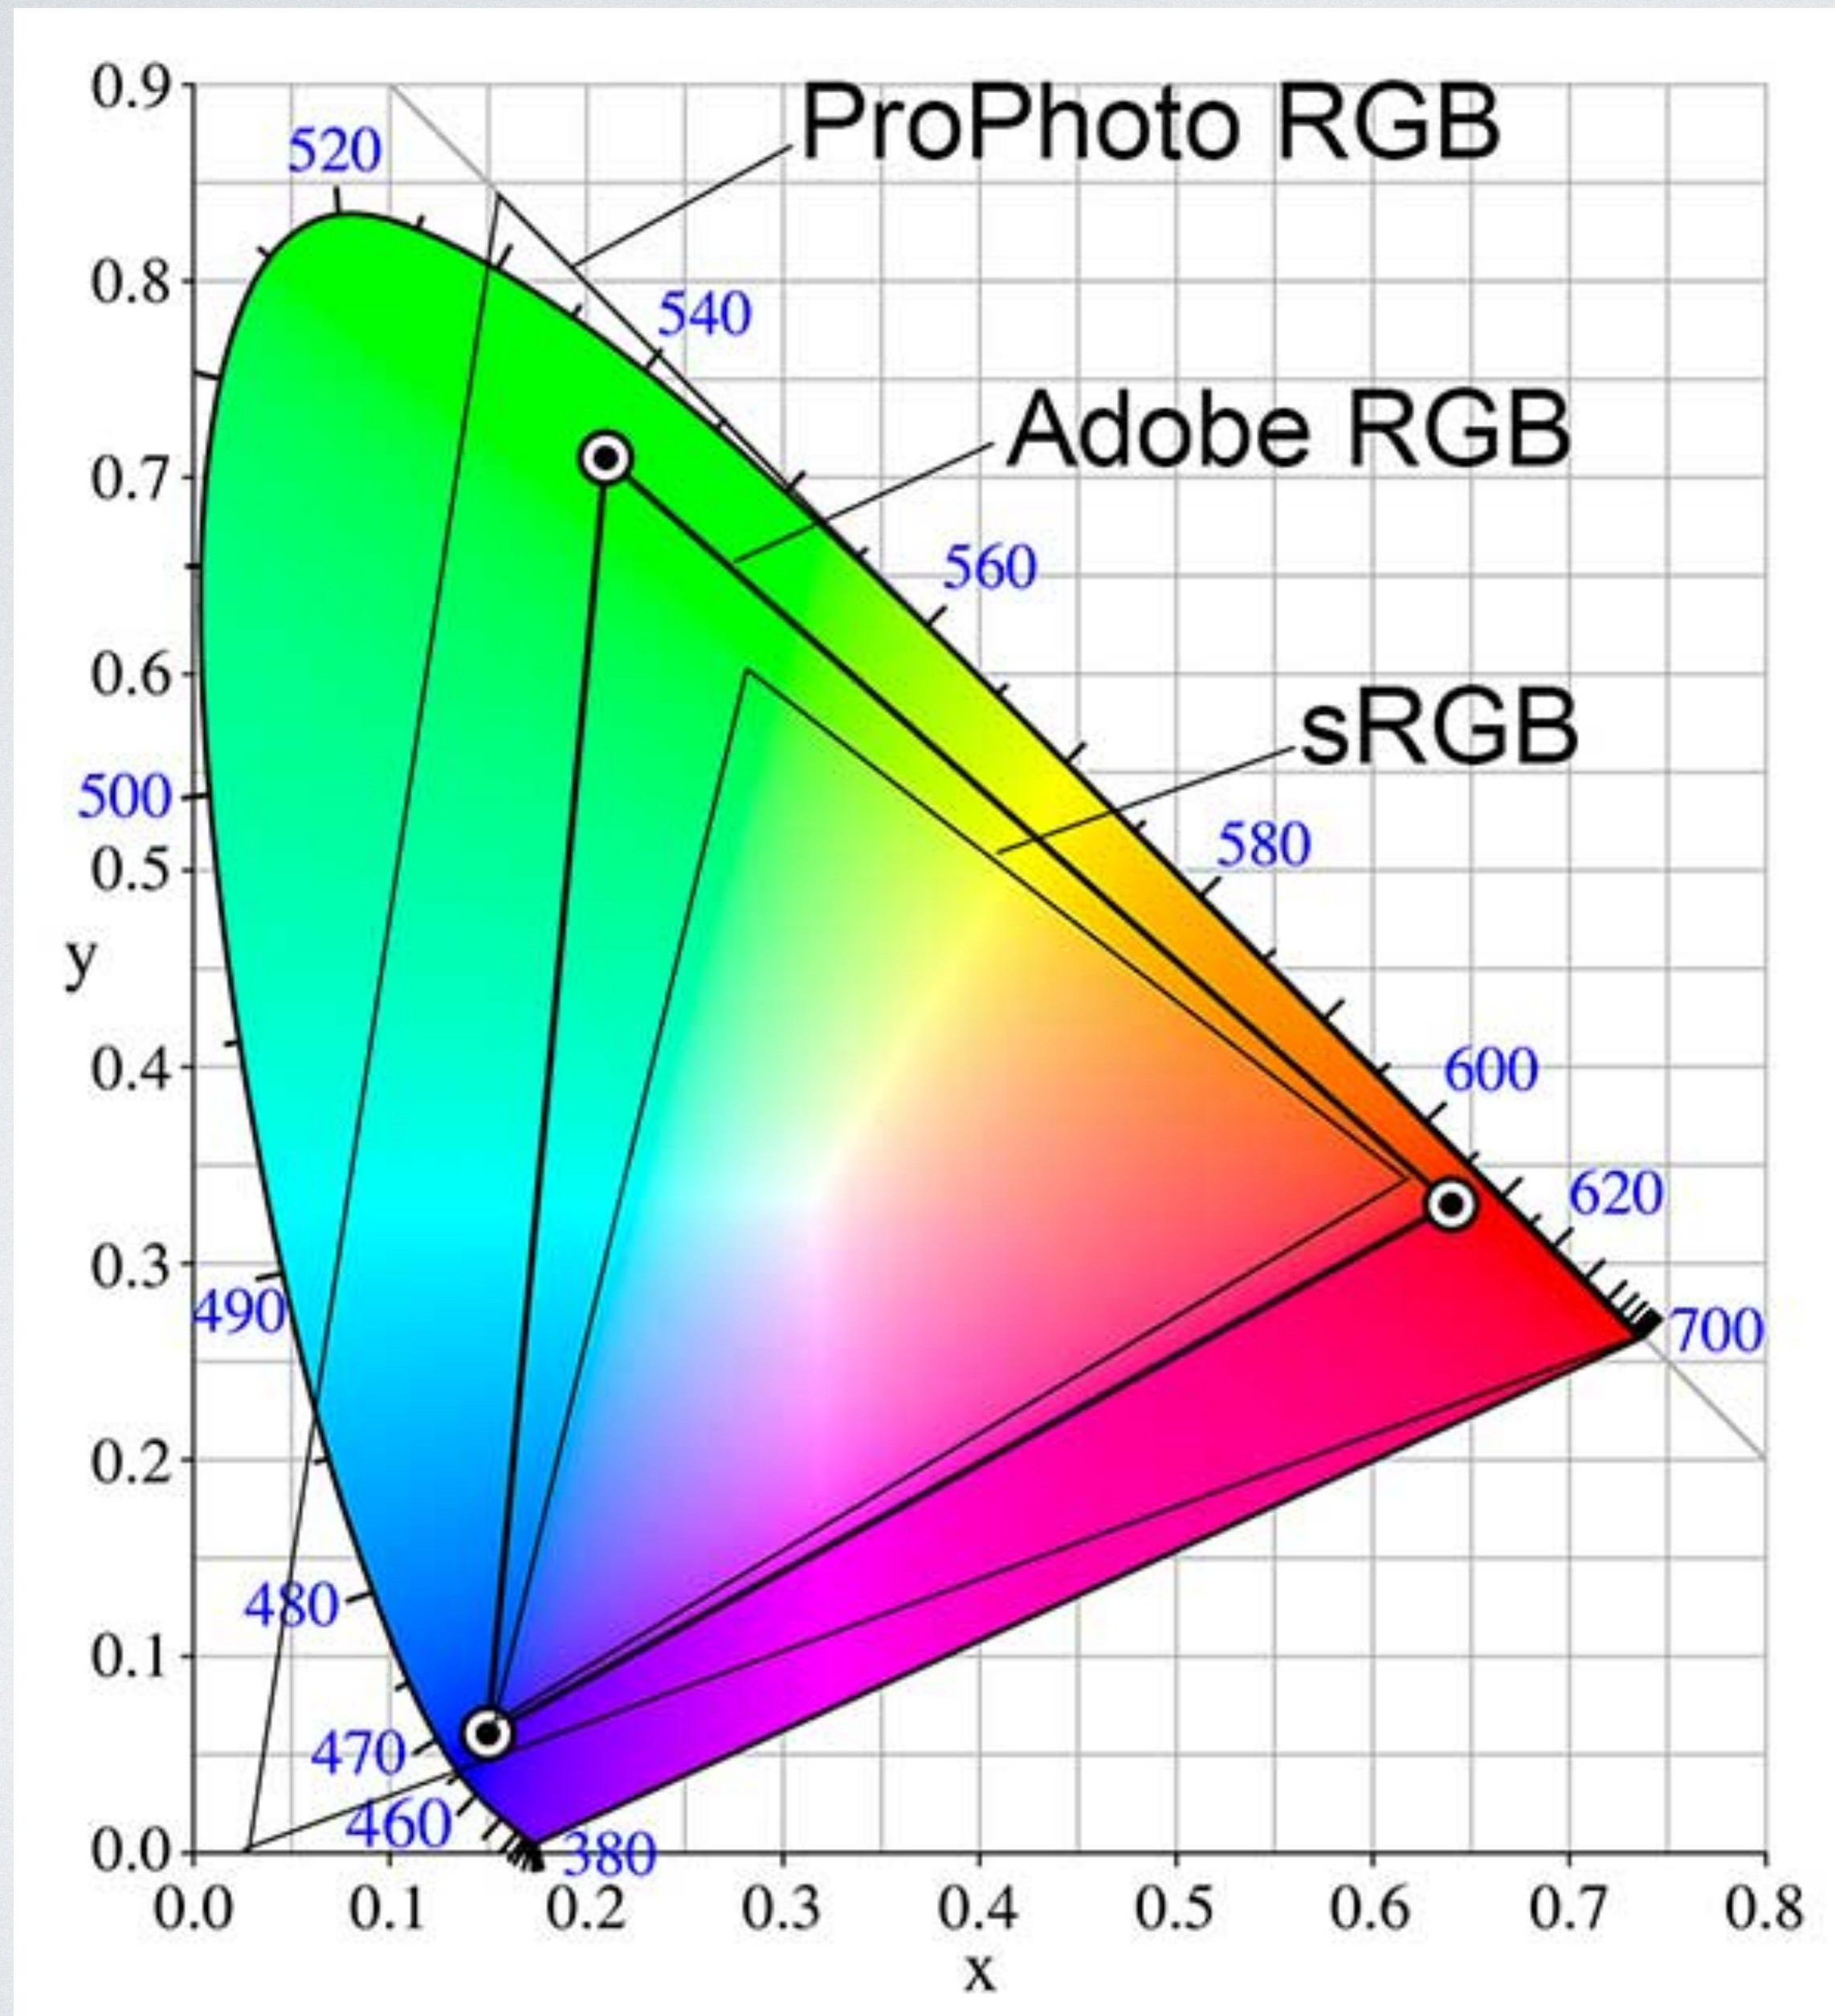

Most Print shops recommend 300 dpi or at least 240 dpi

Some online print services will show the max print size of your file

Make smaller test prints on paper samples before making a large print

Test resolution before making large prints by printing a segment of your image

Compare test prints against monitors

COLOR SPACES

Print size 300 dpi Guide Lines

Print size (in)	Image size (pixels)
4 x 6	1200 x 1800
5 x 7	1500 x 2100
8 x 8	2400 x 2400
8 x 10	2400 x 3000
8.5 x 11	2550 x 3300
9 x 16	2700 x 4800
11 x 14	3300 x 4200
16 x 20	4800 x 6000
